ERAS success at Scripps Health
HealthTrust awarded its 2019 Innovation Grant to Scripps Health for comprehensive ERAS implementation and a year later the team has been busy putting the award to use. Scripps Health member hospitals and M.D. centers have been able to expand portions of the grant to better serve in areas such as patient education and the other ERAS protocols.

Full speed recovery
Patient-centered ERAS protocols speed conventional wisdom with 'wildly successful' results

Changing Patient Expectations
The first wave of ORP implementation is focused on preventing surgery patients from becoming chronic opioid users. At the heart of the initiative is a series of education-oriented interventions delivered across episodes of care—starting with a patient's initial visit to the hospital or physical therapist—and continuing for those who undergo surgery.

Before the summit, we knew there was an opioid epidemic, but saw it more as something that affected chronic pain patients. We hadn't wrapped our heads around the fact that providers might actually be creating some of these dependency situations.
